# Preface

Gallery 1.1.1. is responsible for the two major collections of the University of Manitoba. One of these, the Fitzgerald Study Collection, is primarily historical. The second, the Permanent Collection, is more general in nature, concentrating on art of the past 40 years. During the past 8 years, acquisitions to this collection have been confined to contemporary art with the exception of donations having a particular relevance to the Fitzgerald collection or to the history of the School of Art. All purchase acquisitions have been of contemporary Manitoba art, as collection policy established in 1981 set the primary focus for future collecting on Contemporary Manitoba art, then contemporary Canadian from outside of Manitoba and finally contemporary International art.

Within this framework, Gallery 1.1.1. collects works which the Acquisitions Committee deems to be of high aesthetic quality and which document important aspects in the development of Canadian and International art or reflect important stages in an artist's development. Concern for how the work would broaden and develop the collection as a whole is always part of the acquisition decision. The Gallery limits its collection to those works which it can care for adequately. Although storage space is currently adequate and has excellent climate control, the total storage space is limited. As a result, most works added to the collections are two dimensional or small three dimensional works. Acquisitions are also limited to those works for which Gallery 1.1.1. can provide adequate conservation and preservation. Works in the collections are made available as widely as possible for research, exhibition and, in some cases, rental to other University departments within the constraints of conservation requirements and/or legal and ethical considerations. Gallery 1.1.1. actively cooperates with other art institutions to provide works from its collection for exhibition when requested within the guidelines described above.

A trust fund set up for the sole purpose of maintenance and development of the collection provides a modest annual budget for acquisitions, conservation, documentation, etc., of the collection. Since 1981, it has been Gallery policy to reinvest as large a percentage of the annual interest as possible in order to increase the earning potential for future use.

The Acquisitions Committee consists of the Director of Gallery 1.1.1., the Director of the School of Art, one member from the community at large, one member from the University faculty, and the President of the University (in an Ad Hoc capacity). The committee reviews curatorial recommendations and offers of donations in accordance with the goals and objectives of the Collection Policy before final acceptance of work into the collection.

Acquisitions began again in 1990, after being on hold for two years, due to the move to new facilities, except for donations that could not be postponed. In 1990, significant works by several Manitoba artists were added to the collection and a complete update of the Permanent Collection documentation, including condition reports and archival photography of most works in the Permanent Collection, was conducted in the summer of 1991. This is the first published catalogue of this collection.

# Conventions and Abbreviations

The entries in this catalogue are organized alphabetically beginning with the name of the artist, followed by the country of birth or where the artist is known to have been significantly active during his/her career, the date of birth and death (if known) and the title of the work. The title of the work is recorded in upper case, followed by any descriptive information (in curved brackets), the title of the suite to which the work belongs, if applicable, [in square brackets] and the date of the work, if known. The medium of the work, in lower case, with edition number, if applicable, is listed next, followed by the size of the work in centimetres, height preceding width preceding depth. IMAGE size, OVERALL size, or both, are listed, depending on the record for a particular work.

Signature location and form, wherever possible, is recorded exactly as it appears on the work, keeping spelling, case and punctuation as they appear on the work itself. Annotations have been omitted, with the exception of dates recorded as part of the signature. Where the signature is illegible, only the location is recorded.

Provenance listing in this catalogue is limited to the nature of the acquisition. i.e. gift, loan or purchase followed by the source of the work (if known). Due to the inadequacy of early record keeping, the acquisition type and source for many works is not known.

The last item in each entry is the Gallery 1.1.1. accession number.
